Gene: PRF1 (ENSG00000180644)

Perforin-1 Precursor (P1) (Lymphocyte pore-forming protein) (PFP) (Cytolysin) [Source: UniProtKB/Swiss-Prot P14222](http://www.uniprot.org/Swiss-Prot/P14222)

Location [Chromosome 10: 72,027,110-72,032,537](http://www.ensembl.org/Chromosome:10:72,027,110-72,032,537) reverse strand.

Transcripts There are 2 transcripts in this gene: [show transcripts](#)

View options:

- [View current gene only](#)
- [View paralogues of current gene](#)
- [View all duplication nodes](#)
- [View fully expanded tree](#)

Use the 'configure page' link in the left panel to set the default. Further options are available from menus on individual tree nodes.
