J. Rehm

# Currently used model for alcohol Comparative Risk Assessment

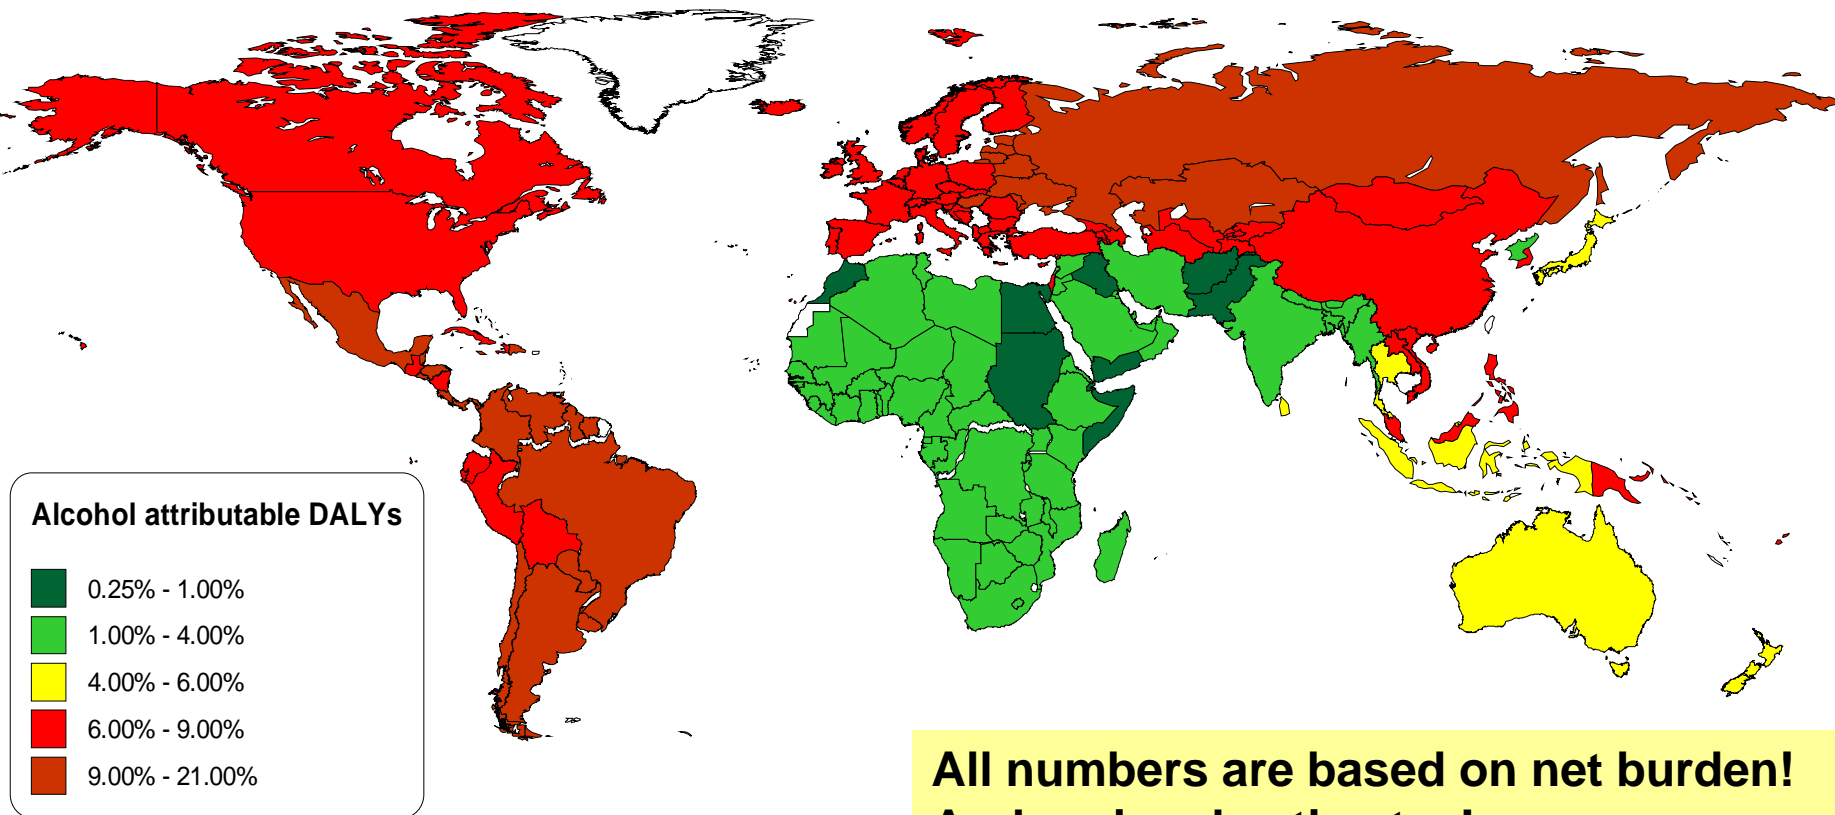

# Total adult per capita alcohol consumption (recorded and unrecorded) in 2005

Source: WHO GISAH (GBD CRA 2005)

# Alcohol-attributable burden of disease 2004 (% of alcohol-attributable to all DALYs)

**All numbers are based on net burden!  
And regional estimates!**

(Source: own calculations which were also the basis of Lancet, 2009)
